**25th European Conference
on the Applications of Evolutionary
and bio-inspired Computation**

part of **evo* 2022**
www.evostar.org

Seville, Spain
20–22 April 2022

evoapps*

special session on

Evolutionary Robotics

**EXTENDED
DEADLINE**

The special session aims to provide a forum for researchers interested in the field of *evolutionary robotics*, the application of evolutionary computation techniques to automatically design robots, real or simulated. This is by nature a multi-faceted field that combines approaches from other fields such as neuro-evolution, evolutionary design, artificial life, robotics, etcetera. We seek high quality contributions dealing with state-of-the-art research in the area of evolutionary robotics.

Topics of interest include, but are not limited to:

- * Reality gap (sim2real)
- * Evolution on real-world hardware
- * Virtual creatures
- * Morphological evolution
- * Neuroevolution for robotics
- * Encodings and developmental approaches for evolutionary robotics
- * Lifetime learning approaches
- * Co-evolutionary and multi-objective approaches
- * Open-ended evolution in robotics
- * Diversity enhancing methods in robotics (e.g. quality-diversity)
- * Evolutionary computation in biorobotics
- * Embodied evolution
- * Evolving multi-agent systems

Submission deadline: 1 November 2021

Extended submission deadline:

24 November 2021

Organizers

Kyrre Glette, Universitetet i Oslo (NO)
Frank Veenstra, Universitetet i Oslo (NO)
